

On results of 47th meeting of JCRB

The 47th meeting of the JCRB was held on September 12-13, 2023, in Costa Rica.

The following recommendations were given at the meeting:

- to carry out thorough RMO review to avoid repetition of comments,
- to timely respond to requests to carry out review and comply with the stated deadlines,
- to register all NMIs/DIs in the Research Organization Registry (ror.org).

Taking into account the previously accepted recommendation to hold two JCRB meetings a year only when necessary, it was decided to hold one JCRB meeting in 2024 on September 24–25 in Sèvres, France.
