

Young Metrologist 2050+

The BIPM Young Metrologist 2050+ initiative has entered its home stretch. Webinars organized jointly with the BIPM were held in all six RMOs.

The COOMET's webinar was held on February 14, 2024 with more than 70 participants taking part in it.

At the moment, the Coordinators Team is busy selecting the best responders.

On July 1–3, the BIPM will host a meeting of the RMOs' Coordinators where the best responders will be selected, and preparations will begin for the final stage of the project.
